TITLE: AWARD OF TELEPHONY LICENSES (TRI FORCE)

EXECUTIVE SUMMARY:

1. PURPOSE OF THE REPORT

The purpose of this report is to recommend approval for the award of contract for the provision for a single supply of Telephony Licenses to be provided by European Electronique and for support for 2 years for the total contract value of £907,945.68.

2. SUPPORTING INFORMATION

This is a new provision for the development of a single telephony platform for the Tri Forces. A single telephony system will create a more uniform, feature rich and stable platform that allows for users to operate regionally and therefore utilise all functionality regardless of location. This platform will form a natural and stable backbone for future development. The new platform will involve bringing each individual force system up to the level of the currently most mature Force Cisco Unified Communications Manager system over a period and providing the same License structure across the Tri-Force area. As this is an on-going roll-out the full use of this contract and the Licenses and Support being acquired under it will be introduced progressively.

Licenses are acquired for life and this contract provides all 9,574 users across the region access to the highest level of functionality, support and upgrades but will only be acquired, and cost incurred, as and when required. Additional costs for support will be only incurred as existing licenses are uplifted to the new license acquired under this contract.
