### [College of Policing publishes report on national demand](#)

The College of Policing has published an analysis of estimating demand on the police service. It is intended that this national report provides a template for local reports to be done. It sets out that although police recorded crime and incidents over the last 10 years have been falling, the trend is now slowing and some crime types are increasing. Police officer numbers have fallen over the past five years stating that in 2014 there was one police officers for every 445 members of the public, an increase of over 50 people since 2010. The changing crime mix means that the costs of crime for the police have not fallen as much as numbers of crimes. Incidents involving mental health issues are increasing and demand resulting from statutory requirements such as Multi-Agency Public Protection Panels appear to be rising. Two indications of emerging pressure on police resilience include reduced levels of police visibility and increasing requests for mutual aid.

### **Debate on the future of policing**

On 5 March, HMIC hosted a debate on the future of policing to examine the fundamental aspects of how policing is organised and resourced. It also consulted on five questions, the responses to which can be submitted online. The deadline is 23 March.

- What should be the role and mission of the service in the future? What does this mean for policing priorities?
- In the future, which policing functions should be provided at a local and/or regional and/or national basis? How prescriptive should this be?
- Are there successful models which bring together local public services to prevent and reduce crime and/or keep victims safe which could be adopted more widely?
- How should the funding available for policing be distributed to match demand, maintain viable forces and encourage efficiency? How should local freedoms and flexibilities to raise additional funds be provided?
- At what point might a force be deemed unviable? What are the warning signs that this is likely to happen?
