[Nottinghamshire PCCs ‘The Beat’ Newsletter](#)

[Crime Statistics, Focus on Public Perceptions of Crime and the Police, and the Personal Well-being of Victims, 2013 to 2014](#)

- The proportion of adults who gave the local police a positive rating (said they did a good or excellent job) was 63% in 2013/14. This represents a small increase from 2012/13 (61%) and is similar to 2011/12 (62%). While not directly comparable, prior to this, the proportion of adults who gave the local police a positive rating increased from 47% in 2003/04 to 59% in 2010/11
- The proportion of adults who reported seeing police officers or police community support officers (PCSOs) on foot patrol, in their local area, about once a week or more (high police visibility) was 32% in 2013/14. This continues the downward trend seen since 2010/11 when the reported level of high police visibility was at its peak (39%). Prior to 2010/11, the proportion of adults reporting high visibility rose from 26% in 2006/07

- There were 19% of adults who thought it was either “very” or “fairly likely” that they would be a victim of crime within the next 12 months
- In line with previous surveys, those who had been a victim of crime in the last year were more likely to: consider both local and national crime rates to have risen over the last few years; have a high level of worry about crime; and to think it likely they would suffer victimisation in the year ahead, than non-victims
- Those who were victims of crime in the previous 12 months reported significantly lower personal well-being than non-victims for measures relating to “life satisfaction”, “life worthwhile”, and “happiness yesterday”. There was no significant difference for “anxious yesterday”
