

Nottinghamshire Police and Crime Survey 2022-23

Quarter 3

December 2022

About the survey

- ❑ The Police and Crime Survey is commissioned by the Nottinghamshire Police & Crime Commissioner and has been undertaken on a quarterly basis across the police force area since June 2017
- ❑ The survey robustly captures and tracks indicators of public trust and confidence in the police and residents' experience of crime and ASB and their satisfaction with any policing services received
- ❑ The survey uses an 'assisted self-completion' method, where teams of interviewers distribute questionnaires, offer support in completing them and return later to collect them if help is not required
- ❑ The survey achieves over 4,260 responses per year based on a sampling scheme representative of the local population at local authority level by age, gender, employment status and ethnicity
- ❑ Sampling points are set at Lower Super Output Area (LSOA) level to ensure good geographic coverage. Residents from all of Nottinghamshire's 697 LSOAs are surveyed over a two year period
- ❑ Quarterly waves of fieldwork help to minimise skews that can be caused by seasonality or significant events. The LSOAs in which fieldwork is undertaken each quarter are evenly distributed by deprivation and population profile
- ❑ In each wave, the survey provides a margin of error of +/-3% at the 95% confidence level across the force area. Responses are aggregated to report on the most recent 12 month rolling period each quarter.

Latest fieldwork and sample size

- ❑ The latest wave of fieldwork was undertaken between 29 October and 13 December 2022 under conditions compliant with the Market Research Society code of practice. In this wave, a total of 1,068 questionnaires were completed.
- ❑ One in eight LSOAs were selected from each of the following geographic areas:
 - Nottingham
 - South Nottinghamshire - comprising Gedling, Broxtowe and Rushcliffe
 - Bassetlaw, Newark and Sherwood
 - Mansfield and Ashfield
- ❑ The survey achieved a sample of 4,316 respondents over the latest reporting period, broken down as follows:-
