DECISION OR INFORMATION:	Decision
DATE RECEIVED:*	23.06.2026
REF:* (to be inserted by the OPCC)	2026.036

TITLE:	Secure Digital Imaging System (SDIS) Support and Calibration

EXECUTIVE SUMMARY:

This paper seeks approval to award a contract to Cubic Transportation Systems Ltd for the provision of Secure Digital Imaging System (SDIS) Support and Calibration services for an initial term of five years, with an option to extend annually for up to a further three years (maximum eight-year term). The value of the initial five-year contract is £228,544.65, increasing to £365,671.44 should all extension options be exercised, assuming no price increases. This procurement represents the re-tender of the existing SDIS (Speed Detection and Information System) contract, which is due to expire in March 2026. Cubic Transportation Systems Ltd currently delivers critical services to Nottinghamshire Police, including the maintenance and calibration of enforcement technology essential for statutory speed limit and traffic signal compliance. As the only approved supplier capable of providing these specialised services, a direct award is required to ensure continuity. The contract scope covers calibration of fixed GTC-GS11 cameras and ongoing annual support services, which are vital to maintaining operational effectiveness, regulatory compliance, and evidential integrity. Approval of this contract will ensure uninterrupted delivery of these essential road safety enforcement services.

INFORMATION IN SUPPORT OF DECISION: (eg report or business case)

This request is supported by a completed tender award report - NOTTS-000464 - SDIS TAR (attached) which evaluates the re-procurement of the Secure Digital Imaging System (SDIS) Support and Calibration contract, necessitated by the expiry of the existing agreement in March 2026. The report confirms that Cubic Transportation Systems Ltd remains the only approved and technically capable provider of these highly specialised services, with no viable alternative suppliers identified in the market. This position is driven by the proprietary nature of the enforcement technology and the requirement for Home Office type approval compliance, ensuring evidential integrity for speed and traffic enforcement.Cubic Transportation Systems Ltd has an established track record of delivering these services to Nottinghamshire Police, including the calibration and maintenance of fixed GTC-GS11 cameras and provision of ongoing system support. Performance under the current contract has met operational requirements, maintaining system accuracy, reliability, and compliance with statutory standards. The continuation of these services is critical to ensure uninterrupted enforcement capability, support road safety objectives, and maintain the legal admissibility of captured evidence.

The tender award report demonstrates that the proposed contract term and pricing represent value for money over the lifecycle of the agreement, with cost certainty provided for the initial five-year period and an assumption of no price increase during the optional extension period. The recommended approach ensures business continuity,

Nottinghamshire Police and Crime Commissioner – Notice of Decision

minimises operational risk, and avoids potential service disruption that could arise from contract lapse or transition to an alternative, unproven provider. Approval of this decision is therefore justified on the basis of supplier exclusivity, proven performance, operational necessity, and the need to maintain continuous, compliant enforcement services aligned with policing and public safety objectives. Signed SDIS TAR below.

FINANCIAL INFORMATION	
The annual cost of the contract is £45,708.93, covering both calibration and ongoing support services. This equates to a total value of £228,544.65 over the initial five-year term, rising to £365,671.44 if the full eight-year duration is utilised. A minor funding shortfall of £3,340.06 in FY 2026/27 will be met through Safety Camera revenue.
